

Our Reputation

European Instruments has achieved an unrivalled reputation through its expertise in the service and calibration of precision weighing equipment and weights.

We hold UKAS accreditation for the calibration of weighing equipment, mass and volume under laboratory number 0438.

We have extended our expertise to the service and calibration of pipettes from all leading manufacturers and our Eurocal service provides a convenient and cost effective service from a single source.

Regular service and calibration will maintain the precision and accuracy of your pipettes. We offer different levels of calibration documentation from DIN 12650 to a UKAS certificate of calibration. The test point protocols can be from our menu listing or from specific user requirements.

In addition to UKAS accreditation we also hold accreditation to BS EN ISO 9001: 2000 through BSI, registration number FS13125.

EuroCal Service

Our **EuroCal** service offers a comprehensive range of repair and calibration facilities in our purpose built environmentally controlled laboratory. Alternatively, we can carry out **On-Site Clinics** to minimise the time your pipettes are away from your laboratory.

We offer calibration contracts which ensures that you have a fixed slot in our calibration programme for a prompt turnaround at agreed times and prices.

QuikCal

Designed for those who may not require extensive measurements and calibration, this includes a simple performance check and a certificate.

FullCal

This service includes cleaning, servicing, a full range performance check, and a **Certificate of Calibration**. The costs of any spare parts are charged separately.

UKASCal

European Instruments have been accredited by UKAS to issue calibration certificates on Pipettes. This service is available at our Oxford Laboratory, alternatively at on-site clinics. Our schedule is available on request, send your pipette inventory and requirements for a quotation.

RepCal

For pipettes that are no longer performing within the manufacturers tolerances or are damaged.

The service includes dismantling, cleaning, servicing, a full range performance check, with a **Certificate of Calibration**.

All spare parts are detailed and charged separately.
